In the Abstract

Please replace the abstract starting on page 82 at line 5 with the following Abstract:

The present invention relates to pyrrolidine compounds of the general structure:

where n is an integer 1-6 and R is hydrogen or a C₁ to C₆ straight chain or branched alkyl group, and wherein when n=1, R=CH₃ or H, useful for re-sensitizing vancomycin resistant Gram-positive bacteria in which resistance results from the conversion of an amide bond to an ester bond on the cell wall peptide precursors of the bacteria.
